

# Open Position

Since more than 17 years, Albis Optoelectronics develops, manufactures and sells photodiode and avalanche photodiode chips for applications in optical fiber communication and sensing. Our global portfolio of demanding customers rely on the performance, high quality and reliability of our chips and subassemblies that are manufactured in our clean room facilities in Rüslikon, Switzerland.

We are looking for a talented scientist with experience in the design and characterization of semiconductor devices to develop new innovative detection solutions in emerging applications.

## Product Manager (m/f)

### Your tasks:

- Feasibility studies, design and simulation of next generation photodiodes.
- Design validation and testing of prototypes.
- Transfer of products and processes into manufacturing.
- Management of product lifecycle processes.
- Supervision of product qualification and reliability testing.
- High level technical customer support.
- Participation in national and international research projects.

### Your profile:

You have a university degree in electrical engineering, photonics, physics or a related discipline. Preferably, you have experience in optoelectronic semiconductor device technology, microwave electronics or practical experience with foundry fabrication processes.

We are looking for an open-minded, professional and highly motivated personality. If you have organisational talent and are very goal oriented, you are best prepared for this ambitious position.

Excellent English and good German language skills, both oral and written, are a prerequisite.

### We offer:

A unique opportunity to develop new innovative optoelectronic products together with a young and international team that has acquired a reputation based on its innovation and quality. This very responsible position is anticipated to make a significant contribution to a successful future of our company.

Did we spark your interest? Become part of a great success story. We very much welcome your application. Please send your CV by mail or regular postal service to:
